**Subject: Setting up of internal channel for reporting of grievance/ concerns regarding occupational safety and hazard**

Dear Sir,

Warm greetings from the National Mission for Clean Ganga (NMCG)

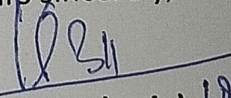

As you all may be aware, on 19 July 2023, a tragic accident took place at an STP site in Chamoli district in Uttarakhand, where due to electrocution certain workers lost their lives. Subsequently, a team from NMCG visited the site in Chamoli to ascertain the ground level situation and informed about the tremendous damage and grieving situation caused due to oversight/negligence of safety measures.

On 20<sup>th</sup> July, 2023, a meeting was called by DG, NMCG and attended by all SPMGs, executing agencies and contractors. The DG, NMCG extended condolence to the grieving families and discussed the importance of adhering to safety measures at STP sites. This was followed by an online training workshop on 'Occupational Safety and Health Administration (OSHA) guidelines' required to be followed at all project sites.

In order to further improve adoption of safety measures at STP sites, a self-reporting system has been envisaged. Anybody who notices an occupational safety issue/grievance or a wants to make an occupational safety related suggestion regarding any of NMCG's STP sites, can report the same at [selfreporting.nmcg@gmail.com](mailto:selfreporting.nmcg@gmail.com). This will facilitate a parallel channel of information to further the adoption of safety measures. This self-reporting system has been evolved to reduce accidents at STP/Pumping Station locations, to improve occupational safety and certainly not to find faults with anyone. The particulars of the individuals reporting these deficiencies shall be kept confidential.

In this regard, a notice has also been prepared and annexed herewith, which can be put up at all Namami Gange STP and pumping station sites.

Yours sincerely,
