Copy to:

The Commissioner & Director of Municipal Administration, AP.

National Mission for Clean Ganga
Format for submission of Monthly Progress Report for Month of August 2023
in the NGT Matter OA No. 673 of 2018
(in compliance to NGT order dated 24.09.2020)

For the State of Andhra Pradesh

Overall status of the State:

- I.** Total Urban Population (2011 Census) : @1.5 Crore
- II.** Estimated Sewage Generation (MLD) : 1503.20 MLD

III. Details of Sewage Treatment Plants:

- Existing STPs and Treatment Capacity (15 ULBs) : 612.95 MLD (49 Nos)
- Present Gap in Treatment Capacity in MLD : 890.25 MLD
- Quantity of Sewerage Treated : 499.40 MLD
- Capacity of under construction STP's (32 ULBs) : 450.17. MLD
(58 STPs)
- Quantity of Reuse of Treated water : 166.83 MLD
- No of STPs Under Construction at APTIDCO Houses : 117.05 MLD (78 ULBs)
(129 STPs)
(0.20 MLD to 3.70 MLD)
- Gap after completion of above STPs : 323.03 MLD
- STPs sanctioned Under SBM 2.0 & Under
Tender Process (below 1 lakh population) : 569.08 MLD
(66 ULBs & 107 STPs)
- STPs sanctioned Under AMRUT 2.0
for Rs.1829.28 Crs by Government of India : 373.27 MLD (26 ULBs)
(DPRs under preparation)

III (A) Details of each existing STP in the State:

Sl. No	City / Town	Location of STP	Date of Commissioning	Existing STP Capacity (in MLD)	Utilization capacity (in MLD)	Operational Status of STP	Compliance Status of STP
1	GVMC	Old town	05/2019	38.00	38.00	Operational	Complied
2		Appughar	09/2010	25.00	25.00	Operational	Complied

III D) STATUS OF STPs UNDER RIVER STRETCHES

- Central Pollution Control Board has newly identified 3 Nos. Polluted River Stretches i.e., Gosthani, Upputeru & Vasishta in Andhra Pradesh and also delisted 5 Polluted River Stretches, previously listed out.
- It is submitted that the River stretches of Gosthani & Upputeru reported by Central Pollution Control Board are fallen within Rural limits. The BOD Levels reported by CPCB are 8.6 and 3.4 respectively by CPCB. As per Report given by AP Pollution Control Board, the present BOD level of Gosthani River for the month of August, 2023 is 5.2 & the BOD level of River Upputeru for the month of August, 2023 is 2.3, which are below admissible levels. This is submitted for taking further necessary action.
- With regard to Vashista River it is submitted that the Stretches (Locations) are Upstream of Narsapuram Town before confluence of town sewage (Code 4365) and Down Stream of Narsapuram Town after confluence of town sewage (Code 4366) and in both locations the maximum BOD level observed by Central Pollution Control Board after confluence of Town Sewage is 58, which is above admissible level. But, as per the Report given by the AP Pollution Control Board, Vijayawada for the month of August, 2023, the average last 3 months' BOD levels taken at the two identified Stretches of River Vashista are 2.4 and 2.7 respectively (Codes:4365 & 4366), which is within admissible levels/limits.
- However, it is further submitted that one STP is taken up with a capacity of 8.00 MLD with an estimated cost of Rs.14.60 Crs under SBM 2.0 and Land Acquisitions is under process. However, the Central Pollution Control Board will also be requested for instructions for preparation of action plan and to submit for further necessary action, in view of the above position.

III E) Status of STPs & NSTPs in the ULBs with below 1 Lakh Population:

State Level Technical Committee and State High Power Committee have approved the construction of STPs in ULBs with below 1 lakh population:

(There are 74 ULBs with below One lakh population)

- Proposed STPs in : 66 ULBs
- Proposed Capacity for the year 2040 : 569.00 MLD
- Total Project Cost : Rs.1445 Cr

As mentioned above, City Sanitation Action Plans and DPRs for 66 ULBs were completed and submitted to Director, SBM & Director, CPHEEO, New Delhi for release of funds.

- In 5 other ULBs with below 1 lakh population (Sullurpet, Nandikotkur, Allagadda, Madakasira and Kanigiri), construction of STPs taken up with funding from Asian Infrastructure Investment Bank (AIIB).
- In another two ULBs with below 1 lakhs Population i.e., Pulivendula & Rayachoti, construction of STPs taken up with State Special Grants.

- i) Puttaparthi, another ULB with below 1 lakh population is already having 3 existing STPs

The above **66 ULBs** have been formed into **13 clusters** and tenders were invited on 04.11.2022 to establish STPs for **569 MLD** with due date of receipt of tender was on 17.01.2023. As bids were not received in the first call, 2nd call tenders were floated on 2nd February, 2023. In response to the 2nd call tenders on 1st May 2023, no response came. Due to no response, proposals are revised in phased manner to sites wherever Govt. Land is available.

The Govt. Land of 52.71 Ac. is available in 53 locations in 28 ULBs covers 131.57 MLD. Fresh call tenders were floated for 8 clusters. Tenders for the above mentioned works were opened on 04.07.2023 Bids received for all the 8 Clusters and Tenders' evaluation is under progress.

Cluster-Wise Abstract on STPs Tenders:

Sl. No.	Cluster no.	No. of ULBs	Total No. of Projects (STP+NSTP)	Proposed Capacity (MLD)	Land available (in Ac)	Project Cost Rs.in Cr
1	Cluster 01	6	19 (1-STP, 18-NSTPs)	7.58	3.38	13.428
2	Cluster 02	4	8 (6-STPs, 2-NSTPs)	18.04	8.62	29.792
3	Cluster 03	3	5 (4-STPs, 1-NSTP)	22.54	9.07	37.245
4	Cluster 04	3	3 (3-STPs)	14.10	4.17	23.265
5	Cluster 05	2	4 (1-STP, 3-NSTPs)	8.45	3.64	14.172
6	Cluster 06	4	6 (2-STPs, 4-NSTPs)	19.23	7.84	32.074
7	Cluster 07	2	3 (3-STPs)	22.90	8.51	37.785
8	Cluster 08	4	5 (2-STPs, 3-NSTPs)	18.53	7.48	30.813
Totals		28	53 (22-STPs & 31-NSTPs)	131.37	52.71	218.573

Government has issued instructions to Municipal Commissioners to identify suitable lands required for construction of STPs & NSTPs. To speed up the Land Acquisition, necessary orders are also issued to the District Collectors to acquire the private land thro' Voluntary Acquisition (Sale) of land Scheme/Programme.

The Finance Department has advised to phase out the construction uniformly across the State with first phase budget outlay of Rs.50 Crs.

The Government accorded administrative sanction vide G.O.Rt.No.227, dated 10.04.2023 of MA & UD Department to initiate Land Acquisition in 22 ULBs (Ac 59.65 cents), under Phase-I to construct STPs/NSTPs. The District Collectors were also requested to initiate the Land Acquisition process for AC. 59.65 cents and give advance possession of Ac.61.83 cents of Government lands and other department lands to ULBs.

IV. Details of Industrial Pollution:

- No. of Industries in the State: 9979 Nos.
- No. of water polluting industries in the State: 1456 Nos.
- Quantity of effluent generated from the industries in MLD: 4543.37

Effluent Break-Up Details:

- Once through Cooling water: 3826.13 MLD
- Trade effluents: 413.48 MLD
- Cooling tower/Boiler blow down: 254.156 MLD
- Domestic waste water: 49.604 MLD

Out of the total waste water generation from the industries, major portion is once through cooling water (about 85%) and temperature to be maintained for discharge of once through cooling system is not more than 5°C temperature of intake water.

- From the Cooling tower/Boiler blow down (about 5.6%).
- The remaining about 9.4% is generated from Trade effluent & Domestic discharges.
- APPCB is not permitting any industry to discharge industrial / trade effluents into the rivers.
- Number of industrial units having ETPs: 1097 No's
- Number of industrial units connected to CETP: 358 No's
 - Existing: 1097 no's ETPs
 - Under construction: Nil
 - Proposed: Nil
- **Compliance status of the ETPs:**
 APPCB is regularly monitoring the compliance status of ETPs and action is being initiated for non-compliance industries. Number and total capacity of CETPs (details of existing/ under construction / proposed).
 - Existing: 9 No's with total capacity of 22.80 MLD
 - Proposed: 1 No's – 0.5 MLD
- 17th Central Monitoring Committee (CMC) review meeting held on 12.09.2023. In this meeting the Central Secretary, Ministry of Jal Shakti GoI, New Delhi, raised issue i.e., 1 CETP of 1.5 MLD proposed to Atchutapuram, Visakhapatnam status not reported in MPR. APPCB direct to APIIC to start the construction of CETP immediately. In this regard, the APIIC representative informed that, the earlier APIIC proposed 1.5 MLD CETP construction has been dropped, due to low generation of effluents.

Status of compliance and operation of the CETPs:

S. No	Name and Address of the CETP & contact person	Design capacity (in MLD)	Current Operating capacity (in MLD)	Type and No. of member units	Compliance status
1.	Brandix India Apparel City Private Limited, APSEZ, Atchutapuram Pudimadaka Road, Visakhapatnam.	6	3.62	Textile park- 14 units (Marine outfall)	Complied
2.	Visakha Pharamcity (Formerly) M/s RamkyPharma City (India) Ltd, JN PharmaCity, Parawada Mandal, Visakhapatnam.	9.53	6.59	Pharmaceutical & Bulk drugs – 92 units (Marine outfall)	Complied
3.	Atchuthapuram Effluent Treatment Plant, Atchutapuram Visakhapatnam.	1.5	0.685	Pharmaceutical & Bulk drugs, other units – 44 (Marine outfall)	Complied
4.	Kondapally Envirotech Pvt. Ltd., (KEPL), IDA, Kondapalli(V), Ibrahimpatnam (M), Krishna District.	0.2	0.0624	Pharmaceutical & Bulk drugs- 14 units (ZLD) (Reused in cooling towers of CETP and in member industries)	Complied
5.	Vijayawada Auto Cluster Development Company, Industrial Estate, Auto Nagar, Vijayawada.	0.2	0.10	Food beverages, Herbal pharma, Oil solvents & lubricants - 35 units (For Green belt development)	Not Complied
6.	Machilipatnam Imitation Jewellery Park Pvt. Ltd., Jewellery Park, Potheipalli, Machilipatnam.	0.07	0.09	Electro Plating – 48 Units (ZLD)	Complied
7.	Nagari Dyeing Owners Association, Chinthalapatteda (V), Nagari (M), Chittoor District.	4	0.8	Manual Dyeing units - 90 units (After treatment , shell be discharged into open channel)	Not Complied
8.	M/s. Andhra Pradesh Industrial Infrastructure Corporation Limited (APIIC), MPSEZ, Menakuru (V), Naidupet (M), SPSR Nellore	1.0	0.05	Pharmaceutical – 16 units (After treatment , recycled into Various Units)	Complied.
9.	M/s. APIIC Mega Food Park, CETP (Phase-I), Sy.No.11, Mallavalli (V), Bapulapadu (M), Krishna District.	0.3	0	1 Unit (ZLD) (Onland for irrigation)	It is under stabilization
	Total	22.8	11.9146		

V. Solid Waste Management:

- Total Number of Urban Local Bodies: **123** and their Population: **1.5** Crore (2011 census)
- Current Municipal Solid Waste Generation: **6890** TPD for 123 ULBs
- The Source Segregation in the State is 98.25%
- The door to door collection in the state 100 %.
- Interim Action Plan is being implemented to provide immediate solution to Solid Waste Management in all ULBs to manage/process wet, dry & combustible waste.

Door to Door Garbage collection & Source Segregation

- Total No. of wards in 123 ULBs: 3928
- No. of wards having door to door collection system: 3928
- No. of wards practicing segregation at source: 3859
- 1.21 crores Dustbins in three Colors (3 Bins to each house holds) have been distributed, on free of cost to encourage segregation at household level.

Waste to Energy Projects

- There are two Waste to Energy Plants established in Visakhapatnam & Guntur with 15 MW capacity each are functioning well, treating 1800 TPD of the Waste from 80 ULBs (Vishakhapatnam – 27 ULBs & Guntur 53 ULBs).
- For Disposal of combustible waste, 43 ULBs are mapped to 5 Cement Plants to treat 355 TPD.

Wet Waste Processing Plants

- Total 42 Waste to Compost plants, Bio-methanation Plants and ISWM Plants are established covering 51 ULBs. Out of which 29 Nos. are Waste to Compost Plants. 4 Nos. are Bio-CNG plants & 9 Nos. are ISWM Plants.
- There are 29 Nos. Waste to Compost Plants covering 33 ULBs with a Processing Capacity of 1315 TPD.
- There are 4 Bio-CNG Plants covering 8 ULBs with a Processing Capacity of 175 TPD.
- There are 9 Nos. Integrated Solid Waste Management Projects covering 10 ULB with a Processing capacity of 380 TPD.
- There are 72 Nos. Windrow Composting Units in 72 ULBs with a Processing Capacity of 1920 TPD of Wet Waste as an interim measure till the establishment of ISWM Projects/Waste to Compost Plants for which work awarded.
- Total 16 Waste to Compost/Bio-methanation Plants (14 Waste to Compost & 2 Bio-methanation) covering 16 ULBs are in progress with an installed capacity of 398 TPD.

- Work orders issued to 37 Agencies for establishment of 37 Integrated Solid Waste Management Projects Covering 51 ULBs. Out of these, 9 Plants are completed & functional, covering 10 ULBs.
- Compost produced is being sold to Farmers by Processing Plant Developers & in ULB operated Plants, Compost is being used in Parks, Greenery in Central Medians, Avenue Plantation etc.
- CNG gas produced is being sold to the Commercial establishments like Hotels, Restaurants etc.,

Material Recovery facilities (MRFs)

- Material Recovery facilities have been established in all 123 ULBs & Processing the dry waste@ 945 TPD.
- Sorted out recyclables are being sold to Identified Recyclers by the ULBs.

Thus, the total waste generated i.e., 6890 MTs is being treated with the existing processing facilities established in the ULBs.

Construction & Demolition Waste Processing Plants

- Construction and Demolition waste processing plants are established in Greater Visakhapatnam Municipal Corporation, Vijayawada Municipal Corporation and Tirupati Municipal Corporation treating C&D waste and utilizing the processed C&D Waste in as paver blocks in footpath works, sand in building/road works. The Paver Blocks & sand are being sold to private agencies/contractors.
- In Kakinada & Kurnool Municipal Corporations, crushing units are established by ULBs. Fly Ash Bricks & 20 mm metal are being manufactured in Kurnool and being sold to private agencies & contractors. In Kakinada the crushed C&D Waste being used to fill the low-lying areas.

Bio-Remediation of Legacy Waste

- 123 Dumpsites with an area of 1011 Acres are existing in the state.
- Out of 32 ULBs under the category of above 1 Lakh Population, Bio remediation of legacy waste was completed in Vijayawada, Tirupati, Ananthapuramu Corporations & Dharmavaram Municipality.
- Work is under Progress in remaining 28 ULBs.
- Out of 91 ULBs under category of below 1 Lakh population, Bio remediation of legacy waste was completed in Nuzvidu, Yelamanchili, Kovvur, Pulivendula, Badvel, Rayachoti.
- Work is under progress in the remaining 85 ULBs.
- So far, 26.10 lakh Tons of Legacy Waste has been treated, out of 85.00 Lakh Tons quantified.

Status of ULB wise Management of Solid Waste

VI. Bio-medical Waste Management:

- Total Bio-medical waste generation: 16 Tones/Day
- No. of Hospitals and Health Care Facilities: 14,149 Nos.

Status of Treatment Facility/ CBMWTF	:	Presently, there are 12 Nos. of Common Bio-medical Waste Treatment and disposal Facilities (CBMWTFs) operating in the State of Andhra Pradesh for treatment and for disposal of Bio-Medical waste as per the BMW Management Rules 2016.
--------------------------------------	---	--

VII. Hazardous Waste Management:

- Total Hazardous Waste generation is about: 48,215 Tones during the month of August, 2023 and cumulative quantity (April 2022 to August, 2023) is approximately 7,43,279.143. Tones.
- No of industries generating Hazardous Waste: 2748 Nos as per Hazardous Waste inventory, 2021 -22.
- **For the month of August, 2023, the Quantity of Hazardous Waste Treated & Disposed is as follows:**
 - Utilizable waste is 28018.99 TPM (suitable to use as raw material or as alternative fuel viz. Co-processing in Cement Plants so as to conserve the resources),
 - Recyclable waste is 2633.24 TPM (suitable for recycling /recovery of material viz. oil reclamation units, lead and zinc recovery units).
 - Incinerable waste is 260.19 TPM (not suitable for any recycling / reuse and having high calorific value i.e. > 2500 K cal/kg) and
 - Land fillable waste is 17131 TPM (not suitable for any recycling / reuse and having low calorific value i.e. < 2500 K cal/kg) is reaching and treated at the TSDFs in Visakhapatnam and Nellore.

Note: The above data is obtained from the APEMC online portal. The above data may vary during verification of annual returns submitted by the industry.

- **Details of on-going or proposed TSDF:**

Two TSDF are existing in the State of Andhra Pradesh

- ✓ M/s Coastal Waste Management Project Unit-1, Parwada, Visakhapatnam.
- ✓ M/s Coastal Waste Management Project Unit-2 a division of Mumbai Waste Management Limited, S.P.S.R. Nellore District.

VIII. Plastic Waste Management:

Total plastic waste generation	36620.101 TPA (As per Annual Report for the F.Y. 2021-22).
Implementation of Plastic Waste Management Rules, 2016 in Urban Local Bodies	133 Nos of Producers and 56 Nos of plastic waste processors are registered in the EPR Portal of CPCB. - The State has issued G.O.Ms.No.349, dated 29.10.2018 for implementation of Plastic Waste Management Rules, 2016 in the ULBs. - The State has released G.O.Ms.No.81, dated 29.11.2022 for implementation of identified Banned Single Use Plastic (SUP) by designating enforcement authorities and stipulating penalties for effective enforcement of PWM Rules. - The plastic waste in Urban Local Bodies is being collected through the Public Health Workers of the ULBs. The segregated plastic waste, which is recyclable, is sent to recyclers i.e., from MRFs and the segregated plastic, which is not suitable for recycling is sent to nearby Cement Plants and also being used in road construction in some ULBs. 43 ULBs have so far, tied up with Cements Plants & Waste to Energy Plants to send non-recyclable Plastic Waste. - The manufacture, sale & usage of plastic carry bags of below 120 microns' thickness is banned in the State of Andhra Pradesh. Teams of APPCB jointly with officials from Urban Local Bodies are making inspections and surprise raids to ensure no sale & usage of banned plastic carry bags. - In Visakhapatnam, Vizianagaram, Vijayawada, Kurnool & Tirupati, under extended producer responsibility, Plastic Waste Collection system has been established. - Instructions issued to the Municipal Commissioners of Head Quarter ULBs to conduct stakeholders' meetings under the Chairmanship of the District Collectors to ensure setting up collection centers under EPR in Municipal Corporations & bigger ULBs. - In Visakhapatnam, Vijayawada, Tirupati, Rajamahendravaram, Kakinada & Amalapuram Plastic Waste is being used in construction of Roads and the details are as follows:

Sl. No.	Name of the ULB	Length of Road Constructed	Quantity of Plastic Waste utilized for constructions of Road
1	Visakhapatnam	8.0 Kms	14.5 Tons
2	Vijayawada	5.0 Kms	5.0 Tons
3	Tirupati	0.9Kms	0.9 Tons
4	Rajamahendravaram	3.0 Kms	4.2 Tons
5	Kakinada	1.2 Kms	2.0 Tons
6	Amalapuram	1.0 Km	0.2 Tons

IX. Details of Alternate Treatment Technology being adopted by the State**Details of Faecal Sludge Treatment Plants:**

No. of Completed FSTPs	:	5 (75 KLD)
No. of In-progress FSTPs	:	60 (905 KLD)
No. of FSTPs Work Awarded	:	26 (365 KLD)

IX. (A): Details of Completed FSTPs:

- X.** Identification of polluting sources including drains contributing to river pollution and action as per NGT order on insitu treatment:
- A total 32 No`s of outfall points of the major disposal drains have been identified which are contributing to River Pollution. All the above 32 No`s of outfall points are provided with Meshes/Screens to prevent solid waste from falling in to the Rivers.
- XI. Details of Nodal Officer appointed by Chief Secretary in the State/UT:**
- Commissioner & Director of Municipal Administration has been appointed as a Nodal Officer for Polluted River stretches as per G.O.Rt.No.103 EFS&T Department Dated: 25-11-2020.
- XII.** Details of meetings carried under the Chairmanship of Chief Secretary in the State/UT:
- XIII. Latest water quality of polluted river, its tributaries, drains with flow details:**
- APPCB has been monitoring the 8 (5+3) polluted river stretches at 31 (27+4) locations on monthly basis and the data is being uploaded in RRC Website <https://rrc.ap.gov.in/Views/Monitoring.aspx> every month. (Annexure)
- XIV. Ground Water Regulation:**
- The main objective of the Ground Water and Audit Department is to monitor Ground Water regime, scientific Development and management of Ground Water resources in the state. In view of repeated droughts and alarming depletion in groundwater resources, emphasis is laid on efficient water conservation and management. One such measure is the enactment called Andhra Pradesh Water, Tree Act (APWALTA) in 2002. This act is a comprehensive act covering surface and groundwater resources. The act aims to promote water conservation, enhance tree cover and regulate the exploitation and use of ground and surface water. The act empowered the State Government to appoint a State Level Authority viz., Andhra Pradesh Water, Land and Tree Authority.
- The Authority has the mandate to promote water conservation, enhance tree cover, regulate exploitation of ground and surface water, make regulations for the functioning of the authorities at District and Mandal Level (administrative units within Districts). The Groundwater Department is providing necessary technical inputs to the authority whenever requested for effective implementation of the Act.

➤ **Periodic Assessment of Groundwater Resources:**

Ground Water Resources Assessment is being carried out periodically under the guidelines of the State Level Committee (SLC) on Groundwater Assessment at State Level and under the overall supervision of the Central Level Expert Group based on the norms and guidelines of the GEC-2015 methodology. Such exercise has been taken up recently for the year 2021-22. The assessment involves comparing of annual extractable Groundwater Resources, total annual Groundwater extraction and the % of utilization with respect to annual extractable resource i.e. stage of development for all 18,380 villages, 670 Mandals and 748 micro basins in the State.

Out of all the states in the country only Andhra Pradesh and Telangana states are doing this assessment taking village as basic assessment unit rest of the states are doing the exercise taking Mandal as basic assessment unit. Based on the computation assessment units i.e., Villages are categorized as Over Exploited where the groundwater extraction is > 100%, critical where the extraction between 90-100%, semi-critical where the extraction is 70- 90 % and Safe where the extraction is <70%. After every periodic assessment the Government come up with a notification listing over exploited villages and ban further exploitation of Groundwater and sand mining in these villages. The below given table gives the region wise classification of these villages in the State. That implies no new permissions to drill bore wells be entertained in these villages.

Number of Mandals and Villages notified as over-exploited in Andhra Pradesh

(as per GEC-2021-22).

Region	No. of Over Exploited Mandals	No. of Notified OE Villages
Coastal	2	64
Rayalaseema	4	82
Total	06	146

XV. Good Irrigation practices being adopted by the State:

The Ground Water and Water Audit Department is not directly involved in execution of the Water Conservation and rainwater harvesting in the state. However, the inferences drawn from the activities of the Ground Water and Water Audit Department are disseminated to the line departments, planners, stake holders for taking appropriate management measures for optimal utilization and sustainable development of Groundwater Resource.

- **Groundwater Quality:**

The Ground Water and Water Audit Department collect Pre and Post monsoon water samples from the permanent monitoring stations and analyze the samples for major cations and anions as to assess irrigation suitability. The Rural Water Supply (RWS) Department is having the appropriate laboratory equipment to analyze all parameters at regional level as the department is specialized in dealing with the issues related to drinking water Parameters. The Pollution Control Board possess the requisite equipment to analyze all the parameters to know the major pollution hotspots and to study the periodical variations, particularly in industrial area.

- **Groundwater Charging:**

Not charging any Groundwater extraction charges as per present policies and legislations However the process of implementation of Groundwater extraction charges for industrial use is under process.

XVI. Rain Water Harvestings:

XVII. Demarcation of Floodplain and removal of illegal encroachments:

XVIII. Maintaining minimum e-flow of river:

XIX. Plantation activities along the rivers:

XX. Development of Biodiversity Parks:

The A.P. State Biodiversity Board have approved a vision plan and perspective plan in its meeting held on 28.07.2020 wherein it has agreed to set up Biodiversity Parks and Digital Museums in 7 districts out of 26 districts in the State to showcase the ecosystems, fauna and flora of Andhra Pradesh and to bring awareness and interest on the ecology and conservation of biodiversity among the general public especially for the student community.

Out of 7 parks proposed the Government have permitted the District Collector, YSR District, Kadapa to handed over 6 Acres of land at Chinnachowk Village, Kadapa Rural Mandal. The A.P. Greening & Beautification Corporation is taking up the works of Biodiversity Park, remaining 6 parks are in process.

As a part of establishment of Biodiversity Digital Museums, the A.P. State Biodiversity Board have entered into an agreement with M/s. KELTRON, Tiruvananthapuram a Government of Kerala Undertaking for supply of Digital Kiosks of 32" 2nos and 42" 1no to each digital museum which displays the world biodiversity, Indian Biodiversity and State Biodiversity in particular to that area in two languages

i.e., English and Telugu. It also provides Play Station, Quiz and Other child interested games related to Ecology. Further, the A.P. State Biodiversity Board have also designed and ordered models and wall panels to display the Andhra Pradesh Ecology Systems in FRP made along with a 10 x 6 size display table and clear acrylic box and wall panels reflecting fauna and flora of A.P, Biodiversity acts printed on Vinyl with lamination, pasting of Vinyl to ACP panel and framing including computer design of 5' x 3' size of 10nos to each museum. All the 7 museums were located in Government buildings identified by concerned Municipal Corporations with in the city limits.

Conservation Activities:

1) Home Herbal Garden:

The National Medicinal Plant Board, New Delhi have sanctioned projects on conservation of Nurseries namely, Home Herbal Garden (HHG) and other one nursery activities. The APSBB have procured and raised nurseries for supply of plants as proposed by the NMPB to supply to the households about 7,80,000 plants are proposed for 13,000 household beneficiaries in 13 districts of A.P. Each district is selected 10 Mandals and in each Mandal 10 villages and in each village 10 beneficiaries totalling to 13,000 beneficiaries as in 1st phase. Till now, 5,89,300 plants were distributed to the beneficiaries.

2) Nurseries:

The National Medicinal Plant Board, New Delhi have sanctioned nursery project to APSBB for raising 7,80,000 bag plant nurseries in 13 districts of Andhra Pradesh out of 13 districts nurseries raised in 11 districts, each nursery consisting of 60,000 bag plants which are to be distributed to the identified beneficiaries of the Grama Sabhas. About 2,28,930 nursery plants were distributed till now under the scheme.

3) Other Nurseries:

The APSBB have raised and procured bag plants of 1,14,000 with ABS funds available and out of the scheme 51,000 bag plants were distributed so far to the identified beneficiaries.

4) Awareness programmes:

The APSBB have created massive awareness programmes to the BMCs, Officials and general public (especially targeting student community) in the past 2.5 years through

physical and virtual mode. Most of the Programmes are virtually organised due to Covid pandemic and created awareness among all sections of public. It also taken up printing of leaflets, brochures, knowledge material and widely distributed through BMCs of all the levels and also by conducting awareness programmes for all stakeholders.

The APSBB have also produced documentary films under the series a window to the A.P. State Biodiversity, about 7 films on wetlands, dry lands, Mada forests, grass lands and Forest Ecology also on HHG, the experiences of biodiversity conservers in the society.

5) CAAP and ICAAP Activities:

As a part of Operationalization of BMCs the APSBB have designed a programme namely Core Activities Action Plan (CAAP) In all BMCs in the State by identifying 15 core activities and selected 551 Mandal Biodiversity Coordinators out of 661 Mandals and organized to open Local Biodiversity fund (LBF) accounts in BMCs on joint operation mode.

To make a model BMCs an Intensive Core Activities Action Plan (ICAAP) with 10 core activities in 78 Mandals of 661 Mandals by taking 20 villages in each Mandal to operate the ICAAP. The 78 Mandals were divided into 26 clusters consisting of 3 Mandals in each cluster to implement the ICAAP activities. In IACCP activities raising nurseries of 1 lakh bag plants in each cluster, establishment of Mandal Biodiversity Park/Raasi Vanam/ Nakshatra Vanam/ Butterfly Park/Smruthi Vanam etc., of 1 Acre in each Mandal. Promotion of Organic farming and land races, cultivation of Wild variety crops, Promotion of unique animal breed, Identification of BHS etc., are included in the ICAAP.

XXI. Reuse of Treated Water:

9 ULBs Utilizing Re-Use of Treated Waste Water

S.No	Name of the ULB	Installed Capacity (in MLD)	Qty of treated sewage utilised (in MLD)
1	2	3	4
1	Visakhapatnam	233.00	85.93
2	Rajamahendhravaram	30.00	20.00
3	Tirupathi	50.00	33.00
4	Narsaraopeta	15.55	8.50
5	Tadipatri	11.50	6.50

6	Puttaparthi	1.50	0.30
7	Kurnool	2.40	0.096
8	Kadapa	20.00	10.00
9	Pulivendula	10.00	2.50
	Total	373.95	166.83

XXII. Model River being adopted by the State & Action Proposed for achieving the bathing quality standards:

2 River stretches are identified as Modal Rivers. i.e. Under Category - IV River Tungabhadra & under Category – V River Krishna.

XXIII. Status of Preparation of Action Plan by the 13 Coastal States:

XXIV. Regulation of Mining Activities in the State/UT:

Irrigation department has carried out bathymetric survey in upstream of Prakasam Barrage i.e., (From KM 0.00 to KM 13.50). It is a scientific study done by using Single Beam Echo Sounder (SBES), Positioning and Navigation systems from Prakasam Barrage to Ibrahimpatnam (About 13.50 km upstream of Barrage) in Krishna River in regular grid intervals of 10m (Both in X & Y Planes). Downstream areas have not come under the purview of de-siltation. The area of study is only foreshore water submerged area which will be considered as reservoir. The study was carried out by hiring the services of M/s BSP Hydro Dredging Works, Bhimavaram. M/S BSP Hydro Dredging Works, Bhimavaram has previous experience in conducting Hydrographic Surveys required for National Waterway-4 in Krishna River from Harischandrapuram to Chamaru and conducted Bathymetry surveys in the Krishna River. Further, the firm has conducted Bathymetry & Hydrographic Survey for design of floating.

- i. The capacity of Prakasam Barrage is 3.071 TMC at 12' (+17.39 Mts) Level from crest level i.e., F.R.L (Full Reservoir Level).
- ii. After conducting the Bathymetric survey, the capacity of Prakasam barrage is 2.982 TMC at 12' (+17.39 Mts)
- iii. Critical areas in barrage w.r.t bed level along with GPS co-ordinates indicating reservoir area is as follows:

The GPS co-ordinates indicating in reservoir area are as follows:

S.No	Village name	Depth in Mt	GPS Coordinates
(a)	Gollapudi	3.0	1632.2381,8033.3658
(b)	Venkatayapalem	3.0	1631.3973,8032.5441
(c)	Lingayapalem	3.0	1634.8838,8030.5596
(d)	Surayapalem	4.0	1632.4663,8033.1526
(e)	Guntupalli	4.5	1634.1632,8031.5177
(f)	Uddandrayunipalem	5.0	1633.5291,8031.2338

In accordance with the Bathymetric survey in foreshore area of Prakasam Barrage from 0.00 to 13.50 KM that the capacity of Prakasam barrage is arrived as 2.982 TMC and the silt volume above original Bed Level to be removed has estimated as 1,24,77,704 Cum. Increase in Water storage capacity after conducting de- siltation of 1,24,77,704 cum quantity as per Bathymetry survey will the water storage will be increased 0.441 TMC. Depth of accumulation and quantity of sand that can be removed in the Villages of Lingayapalem and Rayapudi.

- After conducting the bathymetric survey, it is observed that the silt accumulated as patches in between 10.80 to 12.700 KM in Lingayapalem Village to a total an estimated quantity of 4,29,710 Cum and in between 12.700 to 13.500 KM in Rayapudi Village to an estimated quantity of 71,177 cum can be proposed for De-Siltation.

No Affect In Flood Banks Above Anicut (Foreshore Area)

- The Left Flood Bank above the Anicut extends from 0.00 to 13.00 KM to a point where it abuts on the Ibrahimpatnam Hills.
- The Right Flood Bank above the Anicut/Starts from Tadepalli Hill and extends up to Undavalli Hills distance of 1.32Km. Later under Flood Control Programme, this Flood Bank is extended up to Vaikuntapuram Hill for a further distance of 22.60Km.
- The flood Banks were stable and no damage was occurred in floods occurred during the year 2009 & 2019, where the discharge was recorded as 11.10 Lakh Cusecs and 8.05 Lakh Cusecs respectively.

Present status on Bhavani Island and measures taken to protect the island due to de-siltation activities.

- As per the records, no de-silting activity conducted surroundings of Bhavani Island and no damage was caused due to de-siltation.

It is submitted that, the Barrage area falls up to 13.5 km from the Prakasam barrage. After the Hon'ble National Green Tribunal Order dated 04.04.2019 that all the de-siltation works have been stopped in Prakasam barrage. In this regard, it is to submit that, after General Elections conducted in May-2019, that the new State Government, in the interest of sustainable sand mining, compliance to environmental regulations, ensuring affordable prices of sand and raising valuable public revenues to the state exchequer, had been reviewed the existing Free Sand Policy. Subsequently New Sand Policy was introduced w.e.f. 05.09.2019 in lieu of Free Sand Policy, by appointing M/s Andhra Pradesh Mineral Development Corporation (APMDC) Ltd., a State Government Corporation, as an agent to operate on behalf of Government to undertake Sand quarrying and supply of Sand to the public, vide G.O.Ms.Nos. 70,71,72,73 of Industries, Infrastructure, Investment & Commerce (Mines-II) Department dt. 04.09.2019. The salient features as per New Sand policy, 2019 is as follows:-

- I. Sand excavation from reaches, transportation to stockyards and loading and transportation from stockyard to end consumers shall be undertaken by M/s APMDC.
- II. Sale price:
 - a. Sale price of sand has fixed at Rs. 375/- per ton at the stockyards established near the sand reaches.
 - b. Sand depots are also established near to the urban centers and District Headquarters where there are no nearby sand reaches. At Sand depots, sale price of sand shall be fixed by adding transportation and loading charges in addition to base price of Rs. 375/- per ton for bringing the sand to the sand depot.
 - c. Transportation charges from Stockyards and Sand depots to the consumer destination are additional.
- III. De-casting of Pattalands:
 - (a) M/s.APMDC shall undertake De-casting of sand from Patta Lands with the consent of pattadars.
- IV. De-siltation of Sand
 - a. Irrigation Department shall take-up de-siltation of Dams, Reservoirs, Barrages and large tanks directly or by allotting the work to M/s APMDC Ltd.
 - b. In case of Irrigation Department undertaking the de-siltation work directly, they shall put in place a suitable administrative mechanism, to efficiently supervise the de-siltation process.

- c. The sand available after de-silting should be handed over to M/s APMDC Ltd. for transporting to stockyards for supply to Government works and public use
- d. In case of handing over De-siltation areas to M/s APMDC Ltd., M/s APMDC Ltd., shall undertake de-siltation works and dispose of the sand as per policy in vogue.

V. Sand extraction in Scheduled areas:

- a. Excavation and transportation of Sand to the Specified stockyards from Sand bearing areas located partially/fully in Scheduled Areas shall be done by forming Tribal Societies as per the Panchayats Extension to Scheduled Areas (PESA) Rules, 2011 with Technical and Administrative support from M/s APMDC Ltd. under the direct supervision and control of the Agency ITDA / District Collector & Magistrate concerned. M/s APMDC Ltd. shall dispose off the sand from the stockyards.

VI. GPS tracking system:

- a. GPS to be fitted in the vehicles carrying sand from sand reach to the stockyard and from stockyard to the consumer.
- b. Vehicles without GPS are not permitted to transport Sand.
- c. No transportation of the sand outside the state is allowed.
- d. Stringent punishment and penalties will be levied, if sand is transported illegally.

VII. It is submitted that, with regard to the detailed study, covering the scope of work to assess the extent of the damage to Avifauna, Aquatic flora and fauna including benthic community, Acharya Nagarjuna University, involving the Departments of Botany and Microbiology, Zoology and Aquaculture, Environmental Sciences and Sociology and Social Work of Acharya Nagarjuna University and Central Pollution Control Board (CPCB) has undertaken the detailed study to assess the extent of the damage to the Avifauna, Aquatic Flora & Fauna including benthic community in the Prakasam Barrage up to 13.5 km's on the upstream side. The report of the study is as follows:

“Basing on the above conclusions drawn from different studies, the members opined that there was no notable negative impact on water quality regarding TSS & Turbidity, Phytoplankton, Riparian vegetation, Zooplankton, Benthos, Fishes and Avian fauna at de-siltation sites in river Krishna during the study period.”

The Hon'ble National Green Tribunal, New Delhi was posted the case on 14.02.2020. Secretary (Mines) filed Bathymatric report and Nagarjuna University report to Hon'ble National Green Tribunal on 17.01.2020.

Further, on 14.02.2020 the matter was came to the Hon'ble National Green Tribunal, New Delhi and ordered that the report needs to be independently evaluated and validated. For this purpose, the Hon'ble National Green Tribunal, New Delhi has constituted Expert Appraisal Committee on the subject of the MoEF&CC, Nominees of CPCB, Indian School of Mines, Dhanbad and the Indian Institute of Science, Bengaluru. The joint Committee may be assisted by the Andhra Pradesh State PCB. The CPCB will be the nodal agency for co-ordination and compliance. The applicants will be free to give their view point/submissions to the CPCB within two weeks. The CPCB will provide all documents to the members of the Committee. The report may be furnished within two months by email at judicial-ngt@gov.in.

Accordingly, the Expert Committee has sought certain clarifications on Bathymetric survey report and Ecological Assessment report from the E.E., KC.Division Vijayawada and Acharya Nagarjuna University. In this connection, the E.E., KC.Division Vijayawada and Acharya Nagarjuna University have been submitted their clarification to the Expert Committee.

The Expert Committee has submitted clarification to the Hon'ble National Green Tribunal, New Delhi on Bathymetric survey and Ecological Assessment which report has been submitted by the E.E., KC. Division Vijayawada and Nagarjuna University and matter posted for hearing on 24.08.2020 in OA No 935/2018. The case is disposed off with no further order is necessary except that the operations be overseen by the same Expert Committee to ensure that no damage is caused to the environment.

Accordingly, a Report dated 20.07.2020 has been submitted by the Expert Committee to the Hon'ble National Green Tribunal, New Delhi. Overall Concluding the remarks in the report are:-

“Overall concluding remarks of the Committee Members

- i. Water Resource Department, Government of Andhra Pradesh has carried out bathymetric survey in conformity with the established and recommended practices. As per the Bathymetric survey carried out during December, 2019 to January, 2020 present storage capacity of Prakasam barrage is 2.982 TMC. There is loss in storage capacity of 0.089 TMC as compared to the design capacity of 3.071 TMC.

- ii. The report submitted by Water Resource Department, Govt. of Andhra Pradesh to Hon'ble NGT is satisfactory.
- iii. From the Ecological assessment report it can be inferred that the **cautious use of dredgers & mechanised boats and judicious desilting activity may not have serious impacts on flora and fauna in Prakasam barrage.**
- iv. Overall the Ecological assessment report is satisfactory excepting the section on Water quality.”

In view of above, the Hon'ble National Green Tribunal, New Delhi order delivered in O.A. No. 935 of 2018 dated 24.08.2020, “no further order is necessary except that the operations be overseen by the same Expert Committee to ensure that no damage is caused to the environment “and all pending applications do not survive and are disposed of.

The State Government, vide G.O.Ms.No.78, Ind. & Com. (M-III) Dept, Dt. 12.11.2020 (copies enclosed as Annexure – 4), has issued orders upgrading the existing Sand Policy 2019 and issued amendments to relevant APMMC Rules vide G.O.Ms.No.25, Ind. & Com. (M-III) Dept, Dt.16.04.2021.

After the conclusion of the tender process, M/s MSTC Ltd. have informed that M/s Jaiprakash Power Ventures Limited has been emerged as a Successful bidder for all the three (3) package by quoting the highest bid amounts of Rs. 477.50 Cr., Rs. 745.70 Crores and Rs.305.60 Crores for Package – 1: Srikakulam, Vizianagaram, Visakhapatnam & East Godavari districts, Package–2: West Godavari, Krishna, Guntur & Prakasam districts and Package – 3: Nellore, Anantapur, Chittoor, Kurnool & YSR Kadapa districts respectively.

It is informed that the Superintendent Engineer, Irrigation Circle, Water Resources Department, Vijayawada has entered an agreement on 10-08-2021 vide agreement No. 21/SE/2020-21 with M/s Reach Dredging Limited, Kolkata for dredging of silt from the Foreshore of Prakasam Barrage from Km 7.500 to Km 8.400 in Krishna River with an agreement value of Rs.5,58,49,600/- for a total quantity of 5,63,000 Cums at the rate of Rs.99.20/- per Cum.

The officials of Irrigation Department, KC Division, Vijayawada was handed over sand for quantity of 55,263 CBM at Tank-1, 93,968 CBM at Tank-2 and 53,268 CBM at Tank-3 of Reach-10 at Mandadam Village of Thulluru Mandal, Guntur District to the Deputy Director of Mines & Geology, Guntur and the Assistant Director of Mines & Geology, Guntur. In turn, the

Deputy Director of Mines & Geology and Assistant Director of Mines & Geology handed over the sand for a quantity of 55,263 CBM at Tank-1 of reach-10 in Mandadam Village, Thulluru Mandal, Guntur District to M/s Jaiprakash Power Ventures Ltd., for disposal of sand. M/s Jaiprakash Power Ventures Ltd., has informed that the buyers are not willing to purchase the sand due to silt is found in the sand and requested to examine the quality of Dredged sand by the technical team to find out the percentage of silt content found in the sand.

Accordingly, the Government constituted a Technical Committee with the officials of Water Resource Department and Mines & Geology Department to study, analyze and ensure the quality and components of sand derived from the dredging of the Prakasam Barrage and to identify the sand suitable for sale purpose and requested the Director of Mines & Geology to take necessary action. The Director of Mines & Geology, Ibrahimpatnam vide Lr. No. 5123961/Prakasam Barrage/Sand/2021, dt: 21.02.2022 directed the Deputy Director of Mines & Geology, Guntur to Coordinate with the officials of other Committee members of Water Resource Department and M/s Jaiprakash Power Ventures Ltd., to see that proper study and analysis is conducted to ensure the quality of sand derived from the dredging of Prakasam Barrage suitable for sale purpose.

The quality of sand analysis report is awaited. A meeting was conducted on 27.05.2022 under the Chairmanship of VD&MD, APMDC between officials of the Water Resource Department (WRD), department of Mines & Geology (DM&G), M/s Jaiprakash Power Ventures Limited and M/s APMDC Ltd., to finalize the action plan for de-siltation of the Prakasam Barrage and its subsequent sale.

- **Name and designation of designated officer for ensuring compliance to provisions under statutes:**

S. No	Department	Designated Officer for ensuring compliance
1	Mines & Geology	DM&G, Vijayawada.

XXV. Action against identified polluters, law violators and officers responsible for failure for vigorous monitoring.

Water Quality Status Of Polluted River Stretches in Andhra Pradesh - 2023**I. River Godavari:**

Andhra Pradesh Pollution Control Board is monitoring water quality of river Godavari at the following locations. Data pertaining to important parameters like, pH, Dissolved Oxygen, BOD, Total Coliform, Fecal Coliform and TDS for the year, 2023 is as follows:

S. No.	Code	Location Point
1	4367	Koundinyamukti (Kukunur) border point between Andhra Pradesh & Telangana States, West Godavari Dist.
2	4359	After confluence with Sabari at Kunavaram (waddigudem), East Godavari Dist.
3	0014	Polavaram, West Godavari Dist.
4	1218	Upstream of Rajahmundry at Kumaradevam
5	2370	At Rajahmundry Upstream of Nalla channel
6	2371	At Rajahmundry Downstream of Nalla channel
7	1219	Downstream of Rajahmundry at Dhawaleswaram
8	4365	Upstream of Narasapuram town before confluence with sewage, West Godavari Dist.
9	4366	Downstream of Narasapuram town after confluence with town sewage, West Godavari Dist.
10	4358	Near GMC Balayogi bridge, Govalanka, East Godavari Dist.

Month-wise data of water quality of river Godavari, 2023

Parameter	Code	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Standard		
														Class A	Class B	Class C

	4358	196	23496	30332	30250	30115	16595	3100	182							

Note: (1) All values are expressed in mg/L except pH & Total Coliform value. Total Coliform is expressed in MPN count / 100 ml.

Remarks: BOD & fecal coliform values found to be within the standard limits stipulated for bathing at all the locations except at U/S & D/S of Narsapuram town. High TDS values at Narsapuram Downstream & GMC Balayogi bridge, Govalanka could be attributed to the intrusion of backwaters of Bay of Bengal.

2. River Krishna:

Andhra Pradesh Pollution Control Board is monitoring water quality of river Krishna at the following locations. Data pertaining to important parameters like, pH, Dissolved Oxygen, BOD, Total Coliform, Fecal Coliform and TDS for the year, 2023 is as follows:

S. No.	Code	Location point
01	1175	Sangameswaram, Kurnool Dist.
02	3083	Srisailam, Kurnool Dist.
03	4381	After confluence with river Musi at Vadapalli, Guntur Dist.
04	1786	Vedadri, Krishna Dist.
05	1787	Amaravathi, Guntur Dist.
06	0025	Prakasham barrage, Vijayawada, Krishna Dist.
07	4375	Pavitrasangamam at Ibrahimpatnam, Krishna Dist.
08	1782	Hamsaladeevi, Krishna Dist.

Month-wise data of water quality of river Krishna, 2023:

Parameters	Code	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	*Standard		
														Class A	Class B	Class C

	1782	15600	16620	15100	16600	14010	9600	4740	6380							
Note: All values are expressed in mg/L except pH, Total Coliform value & Fecal Coliform. Total Coliform & Fecal Coliform is expressed in MPN count / 100 ml.																
Remarks: BOD & fecal coliform values found to be within the standard limits stipulated for bathing at all the locations. High TDS values at Hamsaladeevi could be attributed due to the intrusion of backwaters of Bay of Bengal.																

3. River Tungabhadra:

Andhra Pradesh Pollution Control Board is monitoring water quality of river Tungabhadra at the following locations. Data pertaining to important parameters like, pH, Dissolved Oxygen, BOD, Total Coliform, Fecal Coliform and TDS for the year, 2023 is as follows:

S. No.	Code	Location point
01	1785	Manthralayam, Kurnool Dist.
02	1174	Bhavapuram, Kurnool Dist.
03	4388	U/S of Kurnool town B/C with domestic sewage & A/c of Rayalaseema alkalies industries at Gondiparla, Kurnool.
04	4389	D/S of Kurnool town A/C with domestic sewage at Gondiparla, Kurnool.

Month-wise data of water quality of river Tungabhadra, 2023

Parameters	Code	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	*Standard		
														Class A	Class B	Class C
pH	1785	7.7	7.3	7.6	8.0	7.9	7.8	7.7	7.8					6.0 – 8.5		6.0 – 9.0
	1174	7.5	7.4	8.1	7.7	7.9	7.3	7.8	7.7							
	4388	7.1	7.0	7.8	7.3	6.8	7.0	7.4	7.7							
	4389	7.2	7.2	7.0	7.5	7.6	7.8	7.3	7.8							
DO	1785	5.7	5.5	5.5	5.6	5.7	5.3	5.7	6.4					6.0	5.0	4.0

	4389	2.2	2.5	2.8	1.2	0.3	2.5	2.8	1.8							

Total Coliform	1785	1046	1300	1414	1553	1300	1203	1120	866					50	500	5000
	1174	1120	1046	1120	1046	1120	1203	1046	921							
	4388	1203	1046	1414	1300	1553	1203	1120	629							
	4389	1414	1733	1986	1733	1553	1120	980	727							
Fecal Coliform	1785	615	320	343	408	479	491	312	196					---	500	---
	1174	479	437	403	420	290	343	278	244							
	4388	549	437	368	343	423	472	368	211							
	4389	525	575	629	689	420	368	258	208							
TDS	1785	820	866	813	644	886	918	962	905					500 - 2000		
	1174	887	991	950	1038	1056	960	857	887							
	4388	953	1165	1065	1052	1477	1208	1009	1090							
	4389	796	930	1120	1032	470	768	732	868							
Note: All values are expressed in mg/L except pH, Total Coliform value & Fecal coliform. Total Coliform & Fecal Coliform is expressed in MPN count / 100 ml.																
Remarks: BOD & fecal coliform values found to be within the standard limits stipulated for bathing at all the locations. However, the DO values found to be between 4.0 and 5.0 mg/lit. at certain instances at U/S & D/S of Kurnool town. Hence, they may be categorized as Class – C at these points.																

4. River Nagavali:

Andhra Pradesh Pollution Control Board is monitoring water quality of river Nagavali at the following locations. Data pertaining to important parameters like, pH, Dissolved Oxygen, BOD, Total Coliform, Fecal Coliform and TDS for the year, 2023 is as follows:

S. No.	Code	Location point
01	4351	River Nagavali at Kureru, Vizianagaram Dist.
02	1448	Thotapally, Vizianagaram Dist.
03	4346	River Nagavali U/S of Srikakulam town.
04	4347	River Nagavali D/S of Srikakulam town.

Month-wise data of water quality of river Nagavali, 2023

Parameters	Code	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	*Standard

Note: All values are expressed in mg/L except pH, Total Coliform value & Fecal Coliform. Total Coliform & Fecal Coliform is expressed in MPN count / 100 ml.																
Remarks: BOD & Fecal coliform values found to within the standard limits stipulated for bathing at all the locations.																

5. River Kundu:

Andhra Pradesh Pollution Control Board is monitoring water quality of river Kundu at the following locations. Data pertaining to important parameters like, pH, Dissolved Oxygen, BOD, Total Coliform, Fecal Coliform and TDS for the year, 2023 is as follows:

S. No.	Code	Location point
1	2351	At Nandyal, Kurnool Dist.

Month-wise data of water quality of river Kundu, 2023

Parameters	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	*Standard		
													Class A	Class B	Class C
pH	7.1	7.7	7.6	7.1	6.9	7.3	7.3	7.1					6.0 – 8.5		6.0 – 9.0
DO	5.5	5.2	5.5	5.2	5.5	3.4	4.8	5.4					6.0	5.0	4.0
BOD	2.3	2.5	2.8	3.3	3.3	3.6	2.9	2.8					2.0	3.0	3.0
Total Coliform	1290	1414	1733	1986	1553	1733	1300	1120					50	500	5000
Fecal Coliform	501	649	525	593	510	529	403	344					---	500	---
TDS	626	742	851	834	592	712	662	751					500 - 2000		
Note: All values are expressed in mg/L except pH, Total Coliform & Fecal Coliform value. Total Coliform & Fecal Coliform is expressed in MPN count / 100 ml.															

**CPCB identified three (3 No's) new rivers based on BOD value during year 2019 & 2021 (BOD > 3mg/L)
In Andhra Pradesh identified following polluted river stretches.**

S NO	ANDHRA PRADESH STATE	RIVER NAME	NWMP STN CODE	LOCATION	MAX BOD OBSERVED (mg/L)
1	Priority IV (BOD between 6.1 and 10.0 mg/L)	GOSTANI	4372	RIVER GOSTANI SAMPLE BEFORE CONFLUENCE WITH M/S DELTA PAPER MILL EFFLUENTS, VENDRA, PALAKODERU	8.6
2	Priority V (BOD between 3.1 and 6.0 mg/L)	UPPUTERU	4379	RIVER UPPUTERU BEFORE CONFLUENCE WITH SEA, AT CHINAGOLLAPALEM VILLAGE, KRUTHIVENNU (M)	3.4
3	Priority I (BOD more than 30.0 mg/L)	VASISHTA	4365	RIVER VASISHTA (GODAVARI) UPSTREAM OF NARASAPURAM TOWN BEFORE CONFLUENCE OF TOWN SEWAGE	5.9
4			4366	RIVER VASISHTA (GODAVARI) DOWNSTREAM OF NARASAPURAM TOWN AFTER CONFLUENCE OF TOWN SEWAGE	58.0

6. River Gostani:

Andhra Pradesh Pollution Control Board is monitoring water quality of river Gostani at the following locations. Data pertaining to important parameters like, pH, Dissolved Oxygen, BOD, Total Coliform, Fecal Coliform and TDS for the year, 2023 is as follows:

S. No.	Code	Location point
1	4372	River Gostani Sample before confluence with M/s Delta Paper Mill Effluents, Vendra, Palakoderu.

Month-wise data of water quality of river Gostani, 2023

Parameters	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	*Standard		
													Class A	Class B	Class C
pH	7.45	7.11	7.33	7.29	7.20	7.27	7.53	8.10					6.0 – 8.5		6.0 – 9.0

Total Coliform	43	75	240	460	460	210	240	210					50	500	5000
Fecal Coliform	9	9	11	14	11	11	7	4					---	500	---
TDS	1050	2180	1530	1480	1158	3852	1510	980					500 - 2000		
Note: All values are expressed in mg/L except pH, Total Coliform & Fecal Coliform value. Total Coliform & Fecal Coliform is expressed in MPN count / 100 ml.															
Remarks: Fecal Coliform values found to be within the standard limits stipulated for bathing.															

7. River Upputeru:

Andhra Pradesh Pollution Control Board is monitoring water quality of river Upputeru at the following locations. Data pertaining to important parameters like, pH, Dissolved Oxygen, BOD, Total Coliform, Fecal Coliform and TDS for the year, 2023 is as follows:

S. No.	Code	Location point
1	4379	River Upputeru before confluence with Sea at Chinnagollapalem (V), Kruthivenu (M)

Month-wise data of water quality of river Upputeru, 2023

Parameters	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	*Standard		
													Class A	Class B	Class C
pH	7.83	7.60	7.73	7.96	7.88	Sample not collected, due to No Flow of water.	7.88	7.80					6.0 – 8.5		6.0 – 9.0
DO	6.6	6.7	6.2	5.8	6.1		5.9	6.2					6.0	5.0	4.0
BOD	2.9	2.9	2.8	2.7	2.6		2.3	2.3					2.0	3.0	3.0
Total Coliform	120	130	210	39	36		75	43					50	500	5000
Fecal Coliform	11	11	14	4	3		9	9					---	500	---
TDS	26170	31460	28300	34700	32800		24500	28220					500 - 2000		
Note: All values are expressed in mg/L except pH, Total Coliform & Fecal Coliform value. Total Coliform & Fecal Coliform is expressed in MPN count / 100 ml.															
Remarks: BOD & Fecal Coliform values found to be within the standard limits stipulated for bathing. High TDS values at River Upputeru before confluence with Sea at Chinnagollapalem (V), Kruthivennu (M) could be attributed due to the intrusion of backwaters of Bay of Bengal.															

8. River Vasishta:

Andhra Pradesh Pollution Control Board is monitoring water quality of river Vasishta at the following locations. Data pertaining to important parameters like, pH, Dissolved Oxygen, BOD, Total Coliform, Fecal Coliform and TDS for the year, 2023 is as follows:

S. No.	Code	Location point
1	4365	Upstream of Narasapuram town before confluence with sewage, West Godavari Dist.
2	4366	Downstream of Narasapuram town after confluence with town sewage, West Godavari Dist.

Month-wise data of water quality of river Vasishta, 2023

Parameters	Code	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	*Standard		
														Class A	Class B	Class C
pH	4365	8.25	8.31	8.42	8.02	7.47	8.39	7.49	8.20					6.0 – 8.5	6.0 – 9.0	
	4366	7.65	7.5	8.02	7.32	7.49	7.70	7.45	8.22							
DO	4365	6.4	6.8	7.4	6.7	8.1	5.4	5.9	6.5					6.0	5.0	4.0
	4366	6.3	6.5	7.2	6.8	7.2	5.6	5.5	5.8							
BOD	4365	2	1.8	2.1	2.4	2.2	2.1	2.6	2.5					2.0	3.0	3.0
	4366	2.2	2	2.6	2.1	2.3	2.4	2.9	2.8							
Total Coliform	4365	240	120	210	93	120	150	210	240					50	500	5000
	4366	210	240	240	210	240	210	460	460							
Fecal Coliform	4365	21	14	11	9	9	7	7	9					----	500	----
	4366	15	7	14	11	14	11	14	11							
TDS	4365	168	124	96	122	11800	25276	22300	208					500-2000		
	4366	21648	27456	30120	21450	11620	28132	27340	620							
Note: All values are expressed in mg/L except pH, Total Coliform value & Fecal Coliform. Total Coliform & Fecal Coliform is expressed in MPN count / 100 ml.																
Remarks: BOD & Fecal coliform values found to within the standard limits stipulated for bathing at all the locations.																

CPCB Water Quality Criteria for Designated Best Use

Designated-best- use	Class of water	Criteria
Drinking Water Source without conventional treatment but after disinfection.	A	• Total Coli forms Organism MPN/100 ml shall be 50 or less. • pH between 6.5 and 8.5 • Dissolved oxygen 6 mg/l or more. • Biochemical Oxygen Demand 5 days 20°C 2mg/l or less.
Outdoor bathing (Organized)	B	• Total Coli forms Organism MPN/100 ml shall be 500 or less. • pH between 6.5 and 8.5 • Dissolved oxygen 5 mg/l or more. • Biochemical Oxygen Demand 5 days 20°C 3mg/l or less.
Drinking Water Source after conventional treatment and disinfection.	C	• Total Coli forms Organism MPN/100 ml shall be 5000 or less. • pH between 6 to 9 • Dissolved oxygen 4 mg/l or more. • Biochemical Oxygen Demand 5 days 20°C 3mg/l or less
Propagation of Wild life and Fisheries.	D	• pH between 6.5 to 8.5 • Dissolved oxygen 4 mg/l or more. • Free Ammonia (as N) 1.2 mg/l or less • pH 9 between 6.0 to 8.5.
Irrigation, Industrial Cooling, Controlled Waste disposal.	E	• Electrical Conductivity at 25°C micro mhos/cm Max. 2250. • Sodium Absorption ratio Max. 26 • Boron Max.2 mg/l.
	Below -E	Not Meeting A, B, C, D & E Criteria.
